# TDDT SANDBOX

- PRE WFE 3
  - SANDBOX will reopen by O/A 15 Feb for all those who were registered prior to the WFE 2 SANDBOX stand down.
  - PRE WFE 3 SANDBOX will use a limited test data base
- WFE 3 SANDBOX
  - Those who registered in the PRE WFE 3 SANDBOX are invited to participate as virtual/self paced evaluators
  - SANDBOX users access evaluation documents from the TDDT website.
    - **<http://www.train.army.mil/tddt/downloads.htm>**
  - Feedback can either be scanned copies of the form or by email but must include the paragraph and line item number.

The screenshot shows a Microsoft Internet Explorer window with the title bar "Training and Doctrine Development Tool (TDDT) - Microsoft Internet Explorer". The address bar contains the URL "http://www.train.army.mil/tddt/downloads.htm". The main content area displays several sections of text and links:

- 4. Tiger Team Online Plugin (Click Here to download)**
  - (10.73M - complete install wizard)
  - Download and install this plugin to enable staffing documents from the Tiger Team Online server.
  - This is not necessary for TDDT to function. Normal Users **do not** have to download this file to use TDDT. In fact, at the time of this writing the Tiger Team Online server is not yet available, but the plugin is here for you for when the server comes online.

# **Database Call Issues and Migration-COA 4**

- Factors
  - Possible database clean up opportunity (collective, individual, sensitive data)
  - Chain training within schools completed on a timely manner
  - Local Administrator Training prior to TDDT activation
  - DTMS requirement for a consolidated database
  - POI/Lesson Plan cut off date May 06

# **Database Call Issues and Migration COA Selected**

- **COA 4.** *Continue the TDDT training schedule (adjusted) and conduct a data call to be received by each center as they are trained. Once training is completed, those center personnel will return to home station and begin using TDDT. This will take place over the 13 Mar through 21 Jul 06 training schedule.*

# **DB Call Migration/Tng Process**

## **(Site specific actions will be coordinate with the POC)**

- **Pre Tng/Migration**
  - Recommend data clean up as much as possible before creating ASAT db copy
  - Ensure the db arrives NLT the Wed prior to the Mon training start date to run usability checks. Unusable dbs will require a second transfer.
- **Tng/Migration**
  - Key personnel to be trained for follow-on “other” training with leave behind TSP.
  - Migration will occur during the training week period
  - ATIA db close down for migration production stand up (Thurs PM-will not impact on SANDBOX db usage for training)
- **Post Tng/Migration**
  - Local Admin (with ATSC Sys Admin Help Desk) assign permissions to TD personnel
  - Data Validation/Update
  - Production use
